Work Experience:

2021 — today React Developer - Team Lead, Clowd9
Developed an admin panel for DeFi products. Converted most of an enterprise JavaScript app to TypeScript. Oversaw a migration of the whole app from Redux to React Query. Worked in Agile environment. Lead a front-end team of 4 developers. Set up CI/CD pipelines.
Technologies: React, TypeScript, MaterialUI, Redux, React Query, GRPC, Formik, Jira, Gitlab

2020 — 2021 Angular Developer Intern, AGInternet
Developed web apps for use in the tourism industry. Mainly worked on new features.
Built a reservation calendar application with JavaScript (PixiJs), embedded in Angular.
Technologies: Angular, JavaScript, TypeScript, PixiJs and PouchDB

2017 — today LAN and CCTV Service Technician, eLcomp
Helped build and maintain internet and camera installations.
Learned general problem solving skills.

About Me:

My goal is to become a Haskell developer. In my spare time I develop a music generation framework. I have been rewriting and refining it for a few years now, and the latest iteration is being developed in Haskell + Futhark, so I am fully confident in using monadic code. I am interested in unix-related technologies. This CV, for example, was built using Nix and LaTeX and I use NixOS as my daily driver. I also learn abstract math and foreign languages in my free time.

Skills:

Programming:	Haskell, TypeScript, OCaml, Futhark, Python, C
Tools:	Nix, Git, Linux, WSL, LaTeX, GitLab, Jira

Education:

2017 — 2020 Liceum Akademickie im. Macieja Płażyńskiego w Pucku
(Highschool in Puck, Poland)

Languages:

Polish:	Native
English:	Fluent in both speaking and writing
