Skills

[Haskell](#), [TypeScript](#), [Scala](#), JavaScript, PureScript, Python, Ruby, Rails, C, Prolog, Git, Linux, L^AT_EX, Nix, Docker

Professional Experience

Game Developer, Garlic Game

Nov 2024 - Present

- Developed several miniapps on the World Chain network
- Deployed smart contracts
- Collaborated within a multidisciplinary team of 5
- Technologies: [TypeScript](#), PhaserJS, NextJS, EthersJS, Supabase

Fullstack Developer, InvTrack

Jan 2024 - Dec 2024

- Developed an inventory tracking application for small restaurant owners
- Built the backend using Supabase and PostgreSQL
- Built an admin dashboard using SvelteKit
- Supported the development of frontend logic
- Set up deployment infrastructure
- Technologies: [TypeScript](#), Supabase, PostgreSQL, React Native, Svelte

Software Engineer, IOHK

Nov 2023 - Jan 2024

- Developed and maintained a command-line interface for managing a node on the Cardano blockchain
- Technologies: [Haskell](#), Hedgehog, Blockchain

Software Developer, Restaumatic

Jun 2022 - Dec 2023

- Worked on various parts of a food ordering system, from websites to mobile applications to payment processing
- Helped rewrite core frontend ordering logic using strong Domain Driven Design principles
- Technologies: [Haskell](#), [TypeScript](#), NodeJS, PureScript, Ruby, Rails, Python

React/Scala Developer, SoftwareMill

Feb 2022 - Jun 2022

- Developed and maintained a cryptocurrency portfolio manager
- Technologies: [Scala](#), [TypeScript](#), ZIO, React, MaterialUI

React Developer - Team Lead, Clowd9

Oct 2021 - Feb 2022

- Developed an admin panel for DeFi products
- Converted most of an enterprise JavaScript app to TypeScript
- Oversaw a migration of the whole app from Redux to React Query
- Lead a front-end team of 4 developers
- Set up CI/CD pipelines
- Technologies: [TypeScript](#), React, MaterialUI, GRPC

- Developed web apps for use in the tourism industry
- Built a reservation calendar application with JavaScript (PixiJs), embedded in Angular
- Technologies: [TypeScript](#), Angular, JavaScript, PixiJs, PouchDB

- Helped build and maintain internet and camera installations
- Learned general problem solving skills

Relevant Side Projects

[Pauzomenunator](#)

- Winner of the second place in the 2024 Hello Game Jam; 4th in community vote
- A puzzle game where you solve the puzzles by interacting with the pause menu
- Role included sole design, programming, leadership and git tutoring
- Lead a team of 4
- Tech stack: Godot, Blender

[Spacelix Opera](#)

- Rhythm rouge-lite game with procedurally generated music and demoscene vector graphics aesthetics
- The music synthesizes with gameplay elements, creating a "playable music video"
- Built using [Haskell](#), Raylib, Apecs, Csound, and Pov-Ray
- A rewrite in OCaml is being attempted

[ServitorAI](#)

- An AI-powered manifestation/pray-for-hire service
- Features include customizable intention setting, duration control, and intensity levels
- Manually integrated Meta Conversions API, Meta Pixel and Stripe payments
- Tech stack: Supabase, Stripe, Groq and sweet and pure HTML/CSS/JavaScript

About Me

I'm always expanding into new areas, currently (May 2025) marketing and game development. In my free time I like to learn and create [everything and anything](#). Aside from programming I'm fairly fluent in computer graphics (Blender, Pov-Ray, Inkscape, Aseprite) and music production (FL Studio, guitar, piano, orchestral scoring).

Education

(Highschool in Puck, Poland)

(Agricultural trade certification)

Languages

Polish: Native

English: Fluent in both speaking and writing
